Best Outdoor Living Design Over \$50,000 – Gold

McPhee Associates

McPhee Associates takes great pride in the work that it does and even greater pride in the relationships that the company has built with its customers over the past 30 years.

“We pride ourselves in building trusting relationships with our customers and we do so by being transparent, honest, and up front about the scope of the project and the cost,” says owner Rob McPhee.

In business since 1972, this second generation company is a full-service design/build operation that completes all types of projects including renovations, remodels, and new home construction.

Last month, McPhee Associates took home three gold awards at the 2014 BRICC Awards ceremony—one for Best Kitchen Remodel over \$120,000; Best New Single Family Home Between 2,500 and 6,000 Square Feet; and Best Outdoor Living Design over \$50,000. McPhee says each of the projects presented his team with the opportunity to showcase the company’s talents, skills, and creativity.

The “Best Kitchen Remodel over \$120,000” award for a home in Centerville called for gutting and expanding the existing kitchen. This was achieved by knocking down one wall, and eliminating one bay from an attached three-car garage. The result is an expansive kitchen that includes a mud room, a utility room, and work space, all of which is as beautiful as it is functional. “I think it was the details—the trim, the moldings, and the cabinets that made this project

so special. Cape and Islands Kitchens did the cabinets and they came out great. The homeowner has a great eye for design and color and made some bold and trendy choices,” McPhee says.

The award-winning “Best Outdoor Living Design Over \$50,000” project, McPhee says, was one that allowed his team to get very creative with an existing structure. Tucked between the house and the detached garage, this courtyard area includes a patio and raised deck walkway. One of the bays from the garage was “repurposed” for the outdoor kitchen. “It’s not your typical barbecue area,” McPhee says.

The “Best New Single Family Home Between 2,500 and 6,000 Square Feet” BRICC award project was completed on a lot in Harwichport. The challenge in this project, McPhee says, was trying to build a home large enough to accommodate a family with six children—while capitalizing on the views out to the water and the dunes. “The house has four bedrooms and offers great views of Nantucket Sound. We were able to give the couple the views they wanted and the space they needed,” McPhee says.

McPhee, a member of HB&RACC’s board, applauds the work that the association does throughout the year on behalf of the industry professionals on the Cape and especially the decision to hold the awards ceremony, which recognizes excellence in the industry.

“The BRICC Awards ceremony is a great opportunity to raise awareness about the talented professionals working on the Cape and it is a great vehicle in which to put some of these projects in the spotlight,” says McPhee.

We are honored and proud to have been recognized for creativity, craftsmanship and professionalism by the Home Builders and Remodelers Association of Cape Cod at the 2014 Building & Remodeling Industry of Cape Cod (BRICC) Awards.

We acknowledge, with gratitude, that these achievements were accomplished by the successful collaboration of the McPhee Associates team with our valued trade partners and clients.

Thank You.
